K	<p>Read the passage and answer the questions.</p> <p>The Sun, at the center of Solar System, and the planets around it are among the wonders of creation. Venus is the second planet from the sun which is sometimes called Earth's twin, because their sizes and weights are alike. You can see it without a telescope and it is the brightest object in the night sky after the moon. However, Venus and Earth are also different. Venus doesn't have life and it doesn't have water. It takes 224 days to orbit the sun. Venus has no moon. It is a dry and hot planet. Strong winds blow all the time. The Romans named it Venus for their goddess of love and beauty.</p> <p>39.
