	Questions	Points
	Close Test	2
P	Complete the text with the given words. <i>own – cell – smaller – important – among</i> Viruses are (43) the smallest microbes on the earth, even (44) than bacteria. They are different from bacteria because they cannot live on their (45) Viruses need to be inside a living (46) to live and grow.	2
	Reading	3
Q	Imagine seeing the night sky turn bright green, purple and red, and that all of these lights suddenly start dancing around. It is one of the most beautiful views known to humans. Although these lights, called auroras, look completely magical, their happening can really be explained through science. Appearing above the North and South poles, they are created when electrically charged particles from the sun knock and go into atmosphere, their color variations depend on the type of gas particles which come together. Auroras do not just appear every night – their activity happens in cycles, and reaches its peak every 11 years. For this reason, interested viewers should really plan their trip carefully. Apart from the poles, auroras are best seen in parts of Canada, Iceland, Norway and the Siberia. Answer the questions according to the text. 47. Why do people make plan to go to the poles? 48. When are the lights in the pole sky created?	2
R	Mark (T), or (F) according to the text. 49. We can see auroras all the time in the poles. F <input type="checkbox"/> T <input type="checkbox"/> 50. Auroras has a scientific reason. F <input type="checkbox"/> T <input type="checkbox"/>	0/5
S	S: Choose the best answer. 51. According to the text aurora is a. the name of an animal in the North pole. b. name of an area in Canada. c. dancing of lights in the sky. d. a thing unknown to human 52. When does the mentioned happening in the text reach to its peak? a. 11 years b. 3 years c. all the time d. every 11 years	0/5
