Read the passage and answer the questions.

1.5

In 1998 the Rover company's Land Rover , one of the most famous cars in the world , celebrated its 50th birthday . But not many people know that its success was a surprise to the company . The idea was born when the Wilk's brothers , who lived on the Welsh Island of Anglesey , wanted a cheap but strong vehicle to travel around their farm . They copied the design of the American "Willy's Jeep" . At that time the Rover car company had problems . In Britain after the war , people did not have enough money to buy Rover's luxury cars , so the company decided to use the Wilk's brothers' idea to make a little money for a few years . Cars are usually made of steel but this was very costly than , so Rover used aluminum , which was cheaper . There was a lot of aluminum because war planes were made of it . The design was very basic and uncomfortable , but strong – "a tractor with passenger seat !" When the first Land Rover was shown to the world at the Amsterdam Motor show in 1948 , it was an instant success. It was perfect for farmers and building companies because it could go to places where no other car could go . Because of Land Rover , the Rover company became stronger and started producing luxury cars again . They listened to the customers' idea , and made changes to the design in 1958, 1972 and 1983 . It became more comfortable and safer , but could still take you over fields , up mountains , into rivers and across deserts.
