پاسخ سؤال ۱:

الف) صحیح

ب) غلط

ج) غلط

د) صحیح

پاسخ سؤال ۲:

دو رابطه به دست آمده را با هم جمع می‌کنیم.

$$\triangle ACC' : BB' \parallel CC' \Rightarrow \frac{BB'}{9} = \frac{AB}{AC}$$

$$\triangle CAA' : BB' \parallel AA' \Rightarrow \frac{BB'}{3} = \frac{BC}{AC}$$

$$\frac{BB'}{9} + \frac{BB'}{3} = \frac{AB+BC}{AC} \Rightarrow \frac{4BB'}{9} = 1 \Rightarrow BB' = \frac{9}{4} = 2.25$$

پاسخ سؤال ۳:

مثلث‌های $\triangle MCH$ و $\triangle ABC$ با نسبت k متشابه‌اند.

$$\left. \begin{array}{l} \hat{A} = \hat{H} = 90^\circ \\ \hat{C} = \hat{C} \end{array} \right\} \Rightarrow \triangle MCH \sim \triangle ABC$$

$$k^2 = \frac{S_{\triangle ABC}}{S_{\triangle MHC}} = 4 \Rightarrow k = 2 \Rightarrow \begin{cases} \frac{AC}{CH} = 2 \Rightarrow AC = 6 \\ \frac{BC}{MC} = 2 \Rightarrow MC = 5 \Rightarrow AM = 1 \end{cases}$$

$$AB^2 + AC^2 = BC^2 \Rightarrow AB = 8$$

$$MH^2 + CH^2 = MC^2 \Rightarrow MH = 4$$

$$AMHB \text{ محیط} = AM + MH + BH + AB = 1 + 4 + 7 + 8 = 20$$

پاسخ سؤال ۴:

$$AC^2 = CH \times BC = 4 \times 5 \Rightarrow AC = 2\sqrt{5}$$

$$AH^2 = BH \times CH = 1 \times 4 \Rightarrow AH = 2$$

پاسخ سؤال ۵:

$$\left. \begin{array}{l} AM = AD \Rightarrow \hat{M}_1 = \hat{D}_1 \\ AB \parallel CD \Rightarrow \hat{M}_1 = \hat{D}_2 \end{array} \right\} \Rightarrow \text{MD نیمساز زاویه } \hat{D} \text{ است.}$$

به طریق مشابه MC نیمساز زاویه C است.

$$\hat{C} + \hat{D} = 180^\circ \Rightarrow \hat{C}_2 + \hat{D}_2 = 90^\circ \Rightarrow \hat{CMD} = 90^\circ$$

پاسخ سؤال ۶:

$$\left. \begin{array}{l} AD = BC \\ \hat{D} = \hat{C} \\ CD = CD \end{array} \right\} \xrightarrow{\text{ض. ض. ض.}} \triangle ACD \cong \triangle BCD \Rightarrow AC = BD$$

پاسخ سؤال ۷:

ضلع مربع را a در نظر می‌گیریم.

$$\frac{MC}{BC} = \frac{3}{4} \Rightarrow MC = \frac{3}{4}a, MB = \frac{1}{4}a$$

$$\frac{AN}{BC} = \frac{2}{3} \Rightarrow AN = \frac{2}{3}a, ND = \frac{1}{3}a$$

$$\frac{S_{ABMN}}{S_{MNDC}} = \frac{\frac{1}{2}(MB+AN)AB}{\frac{1}{2}(MC+ND)CD} = \frac{\frac{1}{4}a + \frac{2}{3}a}{\frac{3}{4}a + \frac{1}{3}a} = \frac{\frac{11}{12}a}{\frac{13}{12}a} = \frac{11}{13}$$
